DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks / Arguments, filed 1/26/06, with respect to the rejection of claims 5-7 and 9 have been fully considered and are persuasive. The rejection of claims 5-7 and 9 has been withdrawn. The examiner acknowledges that applicants have canceled claim 8 and added its limitations into claim 5 in order to advance prosecution and by doing so the prior art no longer reads on claim 5.

Allowable Subject Matter

2. Claims 1, 5-7 and 9 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach or fairly suggest a performance enhancing break-in that further comprises the step of raising the potential of the anode while exposing the anode to an oxidant reactant and continuing to expose the cathode to a reducing fluid reactant. And there is no motivation in the prior art for a person of ordinary skill in the art to perform such action to a fuel cell stack.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
